

# 2026 SANITARY REQUIREMENT

**Bookings by phone only: +33 (0)6 28 62 37 16**

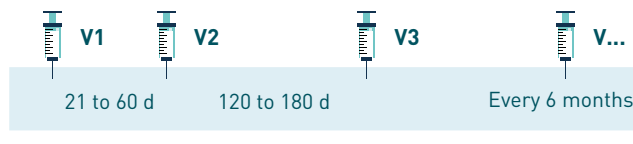

Please send the following documents  
before covering to **KARINE@SUMBE.FR** :

## FOR ALL MARES

- ✓ Copy of passport
- ✓ Microchip number + French SIRE number
- ✓ Full vaccination history – Flu and EHV1-4
- ✓ Analysis results
- ✓ Signed contract & Filled up mare form

### ☐ VACCINATION

In case of a break in the vaccination protocol: restart a primary vaccination course with 2 injections given 21 to 60 days apart

### ☐ ANALYSIS

**CEM** ( Contagious Equine Metritis )

Research	Accepted method	Empty or barren mares	Mares with foal at foot
<b>Clitoral CEM (sinus and fossa)</b> Taylorella equigenitalis Klebsiella pneumoniae Pseudomonas aeruginosa	Culture or PCR	<b>Negative result</b> After January 1 <sup>st</sup> 2026 <i>If positive: capsular typing</i>	<b>Negative result</b> After January 1 <sup>st</sup> 2026 <i>If positive: capsular typing</i>
<b>Cervical CEM</b> Taylorella equigenitalis Klebsiella pneumoniae Pseudomonas aeruginosa	Culture or PCR	<b>Negative result</b> After January 1 <sup>st</sup> 2026 <i>If positive: capsular typing</i>	<b>Negative result</b> <i>If positive: capsular typing</i>
<b>Cervical Bacteriology</b>	Culture	<b>Negative result</b> <i>If positive: treatment required with veterinary certificate</i>	<b>Negative result</b> <i>If positive: treatment required with veterinary certificate</i>

**EVA** ( Equine Viral Arteritis )

**Negative result test dated less than 30 days before each cover.** ELISA or serum neutralization.

*If positive: two stable or declining serological results taken 14 days apart.*

**Coggins test**

Not mandatory, but recommended. To be carried out after January 1<sup>st</sup>, 2026.

### ☐ HIGH RISK MARES

- mares who have had previous contact with CEMO
- mares covered by infected stallion
- mares who originate from countries other than France, Germany, England, Ireland, Italy, USA, Canada
  - Two negative clitoral swabs taken 7 days apart
  - One negative cervical swab taken after January 1<sup>st</sup>, 2026

### ☐ CHANGE OF STALLION

In the event of a change of stallion during the breeding season, new tests for Equine Viral Arteritis (EVA) and Contagious Equine Metritis (CEM) must be carried out on samples taken no earlier than 7 days after the last covering (CEM) and 14 days after the last covering (EVA).

*An identification check will be carried out using the microchip number and the original passport.*

*Sumbe reserves the right to request any additional tests it deems necessary.*

*In the event of an incomplete or non-compliant file, Sumbe may refuse to cover the mare.*

*Please note that foal heat coverings are not a priority, and Sumbe reserves the right to accept or refuse them.*
